Part 2: Sorted by County Worked In	13 - 23

About the Missouri State Census Data Center (MSCDC) Program

In 1979, the State of Missouri and the U.S. Bureau of the Census began a cooperative program designed to enhance the awareness, access and use of census and other public data and information. The Missouri State Library operates the Missouri State Census Data Center (MSCDC) Program for the purpose of disseminating census products and services to residents of Missouri and the public at large.

Through its agreement with the Census Bureau, the MSCDC receives computer tape files, geographic map files, printed publications, CD-ROM and other electronic media products. The MSCDC also receives the technical training and support necessary to take full advantage of these products. The MSCDC, in turn, supports the promotion, access, dissemination and use of the data products by the public through its affiliate network agencies.

A core group of agencies in the MSCDC program work in cooperation with the state library to provide information, products, systems development and user support services related to census data. These agencies are the State Demographer (Missouri Office of Administration-Jefferson City); the Office of Social and Economic Data Analysis (University Extension-Columbia); the Urban Information Center (University of Missouri-St. Louis); the Geographic Resources Center (University of Missouri-Columbia); and the Missouri Small Business Development Centers Program (University of Missouri-Columbia).

Data users receive local access to and assistance with census demographic information and products through the statewide affiliate agency network. The MSCDC affiliates include state government agencies, local and regional planning councils, and public and academic libraries. The Business and Industry Data Center Program (BIDC) is an expansion of the MSCDC program to increase access to economic statistics. The BIDC affiliates assist data users to effectively use economic census information. The BIDC affiliates include business and industry specialists through University Extension, Missouri Small Business Development Centers, and the Missouri Department of Economic Development.

The statistical data derived from the Census Bureau's annual surveys and census data files appear in standard printed reports published and distributed by the Census Bureau and made available to the public through the MSCDC program. The MSCDC also produces and distributes its own printed reports of special interest to Missouri residents and the public at large. Many of the MSCDC reports are available on diskette in spreadsheet and word processing formats and through online networks such as INTERNET.

The MSCDC group use the capabilities of the University of Missouri Computing Network to support over 2,000 public machine-readable data files that are currently available through the program. The Geographic Resources Center maintains the extensive collection of census maps from which copies can be obtained.

For additional information about the MSCDC products and services, contact one of the following MSCDC representatives:

Introduction

The information presented in this report is from a special tabulation of the 1990 Census of Population and Housing. The data is for all persons living in the United States and the District of Columbia, both civilian and members of the U.S. Armed Forces, who were 16 years old and over and who were employed and at work during the census reference week; that is, the calendar week preceding the date on which the respondents completed their questionnaires or were interviewed by enumerators.

For your convenience, the MSCDC presents the data for Missouri counties in 2 parts: 1) by county of residence and 2) by county worked in. Only counties with at least 250 commuters are reported here.

**COMMUTING PATTERNS FOR MISSOURI COUNTIES
